PROFESSIONAL SUMMARY

Full-stack developer specializing in React Native and React, experienced in building cross platform mobile and web applications with scalable UI architecture, REST API integrations, and optimized state management. Strong focus on product driven development, reusable components, and performance focused mobile experiences.

EDUCATION

Bachelor of Technology (AI ML) 2024 - 2028
Newton School of Technology (ADYPU), Pune Grade: 8.98/10.0

Intermediate (Class XII) 2023 - 2024
K V No.5 Mansarovar, Jaipur Grade: 80.0%

Matriculation (Class X) 2021 - 2022
K V No.1 Army, Jodhpur Grade: 88.0%

PROJECTS

BrainStorm Builder ([Github](#)) ([Demo](#)) April 2026

- Built a **JSON driven** layout editor supporting **import/export**, file based persistence, real time state synchronization.
- Designed **event driven interaction system** handling drag, resize, keyboard controls, constraint-based layout updates
- **Profiled** and **optimized** render performance using React DevTools, maintaining **10–12ms per render (60 FPS)**.
- Implemented bi-directional JSON panel with file **upload/download**, enabling live editing and **reconstruction** of UI.
- **Tech Stack:** React, JavaScript, Vite, Pointer Events API, HTML, CSS

Customer Churn Agentic Retention System ([Github](#)) ([Demo](#)) March 2026

- Trained and evaluated a **Random Forest model** for **churn prediction** with cross-validation
- Built **data preprocessing pipeline** including encoding, scaling, and null handling
- Worked on **feature engineering** and **model evaluation** (ROC-AUC, accuracy analysis)
- **Integrated ML outputs** into a larger system involving explainability and **LLM-based retention** strategies
- **Tech Stack:** Python, Scikitlearn, Retention Agent, SHAP

Worddle Mobile Game ([Github](#)) ([Demo](#)) March 2026

- Built a cross-platform Wordle app with **accurate duplicate letter evaluation** and **real time feedback logic**.
- Implemented **deep linking** with **shareable, encoded game URLs** for secure custom word challenges.
- Designed a **state driven architecture** handling grid, keyboard feedback, and full **game lifecycle management**.
- **Tech Stack:** React Native, Expo, JavaScript

Job Sync ([Github](#)) ([Demo](#)) December 2025

- Aggregated and normalized **100+ job listings** across **multiple platforms** into a unified system
- Designed **backend workflows** to scrape and normalize job listings from platforms such as Internshala, Unstop.
- Worked on structuring data storage and **API** responses to support clean and scalable job search functionality.
- **Tech Stack:** Express JS, JWT, Bcrypt, Web Scraper, APIs, MySQL, Prisma ORM, React JS

CERTIFICATIONS

Deloitte Technology Job Simulation Deloitte ([Link](#)) April 2026

- Implemented data transformation logic with unit tests and drafting a software development proposal for machine health.

McKinsey.org Forward Program McKinsey.org ([Link](#)) November 2025

- Developed structured problem solving, communication, and data driven decision making through real world scenarios.

Software Engineer Intern Certificate HackerRank ([Link](#))

September 2025

- Demonstrating proficiency in data structures, algorithms, and problem solving under timed assessments.

Postman API Fundamentals Student Expert Postman ([Link](#))

August 2025

- Designed and executed API requests (GET, POST, PUT, DELETE) using Postman.

SKILLS

Computer Languages: Machine Learning, Python, TypeScript, NoSQL, HTML, CSS, JavaScript, SQL

Software Packages: Pandas, React Native, Prisma ORM, React, Node.js, Excel, Express JS, MySQL, MongoDB

Additional Courses: Data Structure

Soft Skills: Creativity, Teamwork, Critical Thinking

Others: AWS, Git and Github, Docker, Spreadsheet, Graphic Design, n8n Introduction, Analytics, Bash Scripting, GitHub Actions

EXTRA-CURRICULAR ACTIVITIES

- Solved **250+ DSA** problems on platforms like [LeetCode](#) and [Codeforces](#) (**max rating 941**).
- Active **open source contributor** with verified contribution badges showcased on [Holopin](#) .
- Contributed to [Shiki](#) by **fixing unhandled promise rejections in lazy language loading**, improving **error handling** and production stability **PR([#1221](#))**.
- Grew a [YouTube](#) channel to **37K+ views and 250+ watch hours** through audience retention insights.
